VISION

Our vision is to prepare the students of medicine to their future clinical life by providing them with the essential and applied basic knowledge from the disciplines included in this module.

MISSION

- a) To provide students of medicine with integrated disciplines of basic medical sciences to provide them with knowledge about the cardiovascular system.
- b) The above-mentioned mission will be achieved through integrated lectures, practical labs, seminars and tutorials.
- c) Enable the students, through the integrated teaching, to comprehend the relation between structure, function, and abnormal structure of the cardiovascular system.
- d) In addition, at the end of this module, student shall be able to integrate the causes of disease to correlate clinical manifestations of diseases in the cardiovascular system.. The student shall understand diseases of national importance in relation to the clinical, therapeutic, preventive and medico legal aspects.
- e) In addition students are given the opportunity to expand their scope of knowledge through SDL/CAL.

List of lecturers:

NO	Lecturer	Discipline
Module Coordinator		
1	Dr. Imad Hashim Mohammed	Pharmacology
1.		
1.	A/P Saad Ali Rasheed	Anatomy (Gross)
2.	A/P Abdulbakee Jameel	Anatomy (Histology)
3.	A/P Insaf Jasim Al Hasson	Anatomy (Embryology)
4.	Lec.. Haider Sabah	Physiology
5.	A/P Mohamed Al Kurtas	Pathology (Histopathology)
6.	Lec.Mohannad	Pathology (Histopathology)
7.	A/P Yaser Salem	Pathology (Forensic Medicine)
8.	A/P Lewai S Abdulaziz	Biochemistry
9.	A/P Yaser Abbas	Biochemistry
10.	A/P Ahmed Salih	Pharmacology
11.	Lec. Imad Hashim	Pharmacology
12.	Prof Batool Matar	Microbiology (Immunology)
13.	Prof Jamela	Microbiology
14.	Dr.. Najah	Microbiology

INTRODUCTION

This module will extend along 4 weeks in year two.

The module focuses on the normal anatomy and function of cardiovascular system in a way that allow the students for better understanding of cardiovascular system disorders.

Beside lectures and practical sessions, students are trained to prepare seminar presentations and given the opportunity to interact with lecturers in tutorials/SDL/CAL.

The inclusion of a few clinical scenarios should give a taste of understanding the relevance of basic sciences to the clinical part of the studies

Student's progress will be monitored through progress tests, seminars and tutorials. The students will also be required to give their feedback on the module through an evaluation form.
